EXPERIENTIA

REVUE MENSUELLE DES SCIENCES PURES ET APPLIQUÉES
MONATSSCHRIFT FÜR DAS GESAMTE GEBIET DER NATURWISSENSCHAFT
RIVISTA MENSILE DI SCIENZE PURE E APPLICATE
MONTHLY JOURNAL OF PURE AND APPLIED SCIENCE

Editores: P. HUBER, Basel · R. MATTHEY, Lausanne · A. v. MURALT, Bern · L. RUZICKA, Zürich

Redactor: H. MISLIN, Basel · Mainz

Vol. XX · 1964

BIRKHÄUSER VERLAG BASEL (SCHWEIZ)

Fasc. I	(15. I. 64)	pag. 1- 56
Fasc. II	(15. II. 64)	pag. 57-112
Fasc. III	(15. III. 64)	pag. 113-168
Fasc. IV	(15. IV. 64)	pag. 169-240
Fasc. V	(15. V. 64)	pag. 241-296
Fasc. VI	(15. VI. 64)	pag. 297-352
Fasc. VII	(15. VII. 64)	pag. 353-416
Fasc. VIII	(15. VIII. 64)	pag. 417-472
Fasc. IX	(15. IX. 64)	pag. 473-528
Fasc. X	(15. X. 64)	pag. 529-592
Fasc. XI	(15. XI. 64)	pag. 593-656
Fasc. XII	(15. XII. 64)	pag. 657-712

Confecit R. JAEGER, Mainz

Absorption intestinal; effect of sulphates on the intestinal absorption of Sr-85 in rats, B 626.

AC₂ 435; a new antifungal antibiotic produced by *Streptomyces* sp. AC₂ 435, B 321.

Acetoacetate formation, v. Adrenal cortex.

Acetylcholin; action of acetylcholine on the responsiveness of effector cells, B 275.

—; der Einfluss von Acetylcholin auf den Calciumumsatz ruhender und kontrahierender Vorhofmuskulatur *in vitro*, B 279.

—; the action of acetylcholine on cells in cat cerebellar cortex, B 217.

—, v. Histamine.

2-Acetyl-2-decarboxamidotetracycline; isolation of 2-acetyl-2-decarboxamidotetracycline from cultures of *Streptomyces psammoticus*, B 83.

ACH, v. Scopolamine.

Acidi nucleici, v. Epidermal growth factor.

Acridine orange; induction of bacteriophage and colicin by means of acridine orange, B 500.

Acrylpolymerisate; zur Einbettung biologischer Objekte in Acrylpolymerisaten, B 469.

ACTH; the effect of ACTH on cholinesterase activity in plasma, whole blood, and blood cells of rats, B 23.

Actinia equina L., v. Expansion contraction.

Actinomycin D, v. Chromosome condensation.

—, v. Testosterone effect.

Active transport; D-xylose, a substrate for the process of sugar active transport by the small intestine, B 302.

Acyrtosiphon pisum, v. Speichelscheide.

Adrenal cortex; the effect of the adrenal cortex and diet composition on the rate of acetoacetate formation by liver slices from infant and adult rats, B 625.

Adrenal medulla, v. Insulin hypoglycaemia.

Adrenalektomie, v. Cortisol-21-sulfat.

—, v. Corticosteroids.

Adrenalectomy, v. β -Galactosidase.

Adrenalin; die Wirkung von Adrenalin auf den ermüdeten *Soleus* der Katze, B 278.

Adrenalin-Oxydasen; Beeinflussung der Adrenalin-Oxydase des Blutplasmas *in vivo* durch biogene Monoamine und Neuropharmaka, B 85.

Adrenergic receptors, v. Phenoxylbenzamine.

¹ Seules les informations les plus importantes sont indiquées. — Es sind nur die wichtigsten Informationen aufgeführt. — Si riportano soltanto le informazioni più importanti. — Only the most important notes are cited.

- Adrenocortical atrophy; the effect of chronic prolonged water loading on prednisolone induced adrenocortical atrophy, *B* 688.
- Aeschna cyanea*; elicitation of strikes of predatory insects by projected images and light spots, *B* 152.
- AET; effets de l'AET sur la spermatogenèse de souris irradiées, *B* 562.
- Age factor in the maturation of collagen. Intramolecular linkages in mildly denatured collagen, *B* 310.
- Agglutination by S protein; red cell agglutination by S protein, a lipoprotein from erythrocyte stroma, *B* 211.
- Aging at the cellular level, *A* 353.
- Aktionspotential, v. Nervenfaser.
- Al³⁺, v. Mutation, katalytische.
- Albumen-gel, v. Zone electrophoresis.
- Albumin- γ -Globulin Quotient, v. Immunologische Reaktionsfähigkeit.
- Aldosterone, v. Formaldehyde.
- Alkaloids; biosynthesis of alkaloids. On the occurrence of keto acids in *Papaver somniferum* L. plants, *B* 371.
- Alkaloide, v. Aspidospermingruppe.
- Alkylbenzolsulfonate; über den Einfluss von Alkylbenzolsulfonaten auf Froschlarven, *B* 277.
- Aluminium-paper covers for tubes or flasks in microbiology, *B* 407.
- Ambystoma mexicanum*, v. Cartilage cells.
- Ameisen; Untersuchungen zum Verhalten der Ameisenmännchen während der imaginalen Lebenszeit, *B* 329.
- Amino acid activation in *Ciona* ovary and developing egg, *B* 216.
- Amino acid changes in the developing feline brain, *B* 262.
- Amino acids; influence of the transport of amino acids on glucose and sodium transport across the small intestine of the albino rat incubated *in vitro*, *B* 122.
- , v. *Limnaea*.
- Amino acids, free, in the egg fluid and embryos of *Pila*, *B* 133.
- 4-Aminobiphenyl, v. N-2-fluorenamine.
- γ -Aminobutyrate transaminase, v. Glutamate.
- γ -Aminobutyric acid and crab muscle fibres, *B* 161.
- γ -Aminobutyric acid; inhibitory action of γ -aminobutyric acid (GABA) on *Ascaris* muscle, *B* 141.
- ϵ -Aminocaproic acid; the effect of ϵ -aminocaproic acid on adjuvant arthritis in rats, *B* 579.
- 1-Aminocyclopentanecarboxylic acid; pituitary adrenal stimulation induced by lethal doses of 1-aminocyclopentanecarboxylic acid, *B* 707.
- 6-Aminopenicillanic acid; reaction of 6-aminopenicillanic acid with frequentin, *B* 605.
- Aminosäuren; zum Nachweis von Aminosäuren im 10-Mol-Maßstab, Trennung von 1-Dimethylaminonaphthalin-5-sulfonyl-aminosäuren auf Dünnschichtchromatogrammen, *B* 559.
- , v. Leukotaktische Wirkung.
- Ammocoetes*, v. Chondrogenesis.
- Ammoniumverbindungen, quaternäre; dünnschichtchromatographische Trennung quaternärer Ammoniumverbindungen auf Celluloseschichten, *B* 233.
- Amoebiasis; eine neue gegen Bilharziose und Amoebiasis wirksame Verbindung, *B* 452.
- Amoebicides; a novel plate assay method for amoebicides, *B* 463.
- Amphetamines; psychotomimetic amphetamines: methoxy 3,4-dialkoxyamphetamines, *B* 366.
- Amphibia, v. Neoplasms.
- Amylase activity in laboratory animal serum and tissues, *B* 635.
- Amyloidosis; immunological aspects of experimental amyloidosis, *B* 693.
- Anaesthetic drug, v. *o*-N-Diisopropylaminoethoxy-butylphenone.
- Anaphylactic shock, v. Histamine.
- Androgen influence on protein and enzyme pattern of rat kidney, *B* 212.
- Angiotensin II; zum Einfluss von Angiotensin II auf die Nebennierenrinde unter chemischer Adrenostase mit SU 4885 (Metopiron), *B* 451.
- Angiotensinamide; the stability of angiotensinamide in the presence of urea, *B* 381.
- Anoxia; effects of anoxia on excitability, refractoriness, and contractility in isolated rabbit atria, *B* 44.
- Antibiotics, v. Irradiation.
- Antibodies, v. Enzymes.
- Antibody formation; monospecific antibody plaque formation by spleen cells from mice immunized with sheep and chicken erythrocytes, *B* 564.
- Antibody production; antibody production in rabbits following immunization *via* the lateral ventricle of the brain, *B* 700.
- Antibody response, v. Arthritis.
- Antidromic activation; intracellularly recorded responses of red nucleus neurones during antidromic and orthodromic activation, *B* 632.
- Antidromic responses; intracellularly recorded antidromic responses of Deiters' neurones, *B* 295.
- Antifungal antibiotic, v. AC₂ 435.
- Antiheparin activity, v. Renal failure.
- Antitumour agents; methylazo and methylazoxy compounds; new types of antitumour agents, *B* 503.
- Antiviral activity, v. Hydrazine sulfate.
- Aortic nerve; respiratory influences upon depressor and pressor responses to stimulation of the aortic nerve in the decerebrate cat, *B* 95.
- Apis mellifica* L., v. H³-D-Glucose.
- Arachidonic acids; the occurrence of arachidonic and related acids in plants, *B* 426.
- Arthritis; delayed hypersensitivity and antibody response in rheumatoid arthritis, *B* 522.
- , v. ϵ -Aminocaproic acid.
- 4-Arylthiosemicarbazides; a novel oxidative cyclization of 4-arylthiosemicarbazides and related compounds, *B* 200.
- Ascaris* muscle; inhibitory action of γ -aminobutyric acid (GABA) on *Ascaris* muscle, *B* 141.
- Aspergillus oryzae*, v. Respiration.
- , v. Vibrating culture.
- Aspidosperma alkaloids; the structures of five new aspidosperma alkaloids related to uleine, *B* 363.
- Aspidospermingruppe; Ableitung der absoluten Konfiguration von Alkaloiden der Aspidospermingruppe durch optischen Vergleich mit Alkaloiden der Strychningruppe, *B* 202.
- ATP; the variation of adenosine triphosphate and adenosine triphosphatase in *Tribolium confusum*, Duval at the different stages of its life cycle, *B* 17.
- ATP determination with the tricarb scintillation counter, *B* 652.
- ATPase, v. Phosphate release.
- , v. ATP.
- ATPase activity; connection between membrane adenosine triphosphatase activity and potassium transport in erythrocyte ghosts, *B* 387.
- ATPase-System; über die Bindung der Ca-Ionen an das Na⁺ und K⁺ aktivierbare Adenosintriphosphatase-System des Gehirns, *B* 28.
- Atrium, rabbit, v. Anoxia.
- Audioconvulsive susceptibilities, v. Chemoconvulsive thresholds.
- Augenpigment, v. *Culex pipiens* L.
- Auto-haemoantibody response; induction of an auto-haemoantibody response in rats injected with a rabbit's RNA-immunocARRIER, *B* 705.
- AY-9944; inhibition of drug metabolism in the mouse by a hypocholesterolemic agent, AY-9944, *B* 517.
- Aza-azepinophenothiazine, v. Veratridine.
- 5-Azacytidine, a new, highly effective cancerostatic, *B* 202.
- Bacillus subtilis*; three antifungal polypeptides from *Bacillus subtilis*, *B* 504.
- Bacteria growing; electron microscopic observation of bacteria growing on the skin surface, *B* 672.
- Bacteriophage, v. Acridine orange.
- Bacterium anthracoides*, v. Leukaemia.
- Basalplatte, v. Placenta.
- Benzene derivatives; chemical structure and biological activity of *p*-disubstituted derivatives of benzene, *B* 667.
- Benzotiadiazinici; azione diabetogena dei derivati benzotiadiazinici nel gatto, *B* 631.
- Benzoyl hydrazides, v. Influenza virus.
- Benzpyrene; effect of feeding benzpyrene on reproduction in the rat, *B* 224.
- Benzpyrene-induced tumours in the clawed toad, *Xenopus laevis*, *B* 143.
- 4-Benzylhydroxy-3,5-dijodobenzoesäure, v. Mitochondrien.
- Bergapten in *Dictamnus albus* L., *B* 615.
- Bicarbonate concentration; the relation between the bicarbonate concentration in blood plasma and in brain tissue, *B* 455.
- Bilbergia* sp., v. Chloroplastes.
- Bilharziose; eine neue gegen Bilharziose und Amoebiasis wirksame Verbindung, *B* 452.
- Biliary secretion; the rate of biliary secretion during flow up vertical cannulas of different bore, *B* 639.

- Bladder epithelium; the characteristic appearance of label in the urinary bladder epithelium following injection of D,L-tryptophan- H^3 in mice, B 453.
- Bleivergiftung; autoradiographische Befunde an den «direkten» Kerneinschlüssen im Hauptstückepithel der Rattenniere nach experimenteller Bleivergiftung, B 379.
- Blood, v. ACTH.
- , v. Phytohemagglutinin.
- Blood, stored, v. Glutathione.
- Blood-brain-barrier; the permeation of drugs across the so-called blood-brain-barrier at low temperature, B 96.
- Blood clotting system in the pathogenesis of the Sanarelli-Schwartzman reaction of the rabbit, B 223.
- Blood plasma, v. Bicarbonate concentration.
- Blood platelets, v. Chlorpromazine.
- , v. 5-Hydroxytryptamine.
- Blutzuckergehalt, v. *Poterium spinosum*.
- Bone marrow, v. Histidine decarboxylase.
- , v. Irradiation.
- Bradykinin, Kallidin, and their synthetic analogues, A 529.
- , v. Kinin.
- Bradykinine, v. Veratridine.
- Brain; amino acid changes in the developing feline brain, B 262.
- , v. Glucose metabolism.
- , v. Glutamate.
- Brain, v. Psychopharmaca.
- , v. Scopolamine.
- Brain stem, lower, v. Monoamines.
- Brain tissue, v. Bicarbonate concentration.
- , v. CO_2 binding.
- , v. $^{14}CO_2$.
- Breathing; minimum entropy production as a design criterion for breathing, B 333.
- Bufo melanostictus*, v. CCl_4 .
- Ca^{++} , v. ATPase-System.
- $CaCl_2$; stimulation of dorsal axial differentiation in ventral explants of *Rana pipiens* embryos by $CaCl_2$ and guanidine HCl, B 23.
- Calcification; relationship between the calcifying power of various substances *in vivo* and their solubility *in vitro*, B 514.
- Calcifying reaction, v. Mast cell depleters.
- Calcium oxalate precipitation, v. Pyrophosphate.
- Candida albicans*, v. Mannan.
- Canthaxanthin als Sekundär-Carotinoid einiger Grünalgen, B 573.
- Capsular stimulation, v. EMG response.
- Carbohydrate, v. Tobacco plant.
- Cartilage cells; fate of cartilage cells in limb regeneration in the axolotl (*Ambystoma mexicanum*) B 431.
- Catalase; the degradation of deoxyribonucleic acid by L-cysteine and the promoting effect of metal chelating agents and of catalase, B 16.
- , v. Gel filtration.
- Catecholamines, v. Tonus effect.
- , v. Psychopharmaca.
- Cavia porcellus*, v. Polymorphism.
- CCl_4 ; effect of carbon tetrachloride intoxication on the liver of toad (*Bufo melanostictus*), B 548.
- Cell walls, bacterial; a procedure for the preparation of gram-quantities of bacterial cell walls, B 253.
- Cells, v. Glycerol.
- Cells, active, solitary; the nature of the solitary active cells of the central nervous system, B 259.
- Cellules vivantes; nouveau procédé original de préparation de cellules vivantes par dissociation du foie de rat, B 467.
- Cellulose acetate, v. Respiration.
- Cerebellar nuclei; monosynaptic inhibition of the intracerebellar nuclei induced from the cerebellar cortex, B 575.
- Cestrum diurnum*, v. Tigogenin.
- Charge-transfer complexations among biochemically reactive compounds, B 501.
- Chelating agents, v. Hydrogen peroxide.
- Chelatkomplexe, v. Schwefel.
- Chemoconvulsive thresholds in mice of differing audioconvulsive susceptibilities, B 291.
- Chemoreflex, v. Veratridine.
- Chinone, v. Ubichinongruppe.
- Chlamydomonas reinhardi*, v. Flagella formation.
- Chlamydospore germination and artificial culture of *Protomyces macrosporus* Unger, B 619.
- 6-Chlor-17 β -acetoxy- Δ^5 -androst-7-on; Darstellung von Derivaten des 6-Chlor-17 β -acetoxy- Δ^5 -androst-7-on, B 249.
- Chloroplast fragments; electrophoretic fractionation of chloroplast fragments in a pH gradient, B 261.
- Chloroplasten, v. Viruspartikel.
- Chloroplastes; étude autoradiographique de l'incorporation de la thymidine- 3H , de l'uridine- 3H et la phénylalanine- 3H dans les chloroplastes de *Clivia miniata* et *Bilbergia sp.*, B 267.
- Chlorpromazine; effect of chlorpromazine and reserpine on the blood platelets of rabbit, B 27.
- Cholesterol; the isolation and characterization of cholesterol in portuguese men-of-war (*Physalia*), B 568.
- , variations of plasma cholesterol among south indian men in relation to economical status and diet, B 640.
- Cholin acetylase, v. Scopolamine.
- Cholinesterase; the distribution of cholinesterase in cat cerebellar cortex, B 218.
- , v. ACTH.
- Cholinesterase activity, v. Corticosterone.
- Chondrogenesis; probable induction of chondrogenesis by the spinal cord tissue in the *Ammocoetes*, B 682.
- Chorisia spec.*, v. Rhoifolin.
- Chromomycin; on the action of chromomycin on the eggs and embryos of *Ciona intestinalis*, B 621.
- Chromosome breakage, v. Hydroxylamine.
- Chromosome condensation; prophase-like chromosome condensation induced by actinomycin D in the slime mold, *Physarum polycephalum*, B 269.
- Chromosomenformel, v. Mutation chromosomique.
- Chromosomes; radiation-induced chromosomal rearrangement in annual chrysanthemum, B 617.
- ; fine structure of meiotic chromosomes of *Gryllus argentinus*, B 610.
- Chrysanthemum carinatum*, v. Chromosomes.
- Ciona intestinalis*; über eine spontane Extrasystolie im Schrittmachersystem des Tunicatenherzens, B 227.
- , zur Ultrastruktur des Herzschauches von *Ciona intestinalis*, B 265.
- , v. Chromomycin.
- Ciona* ovary, v. Amino acid activation.
- Clibanarius longitarsis*, v. Sperm nucleus.
- Clivia miniata*, v. Chloroplastes.
- $^{14}CO_2$; the rate of incorporation of gaseous $^{14}CO_2$ into brain tissue constituents, B 98.
- CO_2 -binding; the CO_2 -binding capacity of rat brain tissue *in vivo*, B 287.
- Cobragift; Abtrennung des anaphylatoxinbildenden Prinzips aus Cobragift von anderen Giftkomponenten, B 207.
- Cockroach, v. Oxygen uptake.
- Cogitationes, B 413, 470.
- Colchicinvergiftung; zur Genese hepatozellulärer Kerneinschlüsse bei Colchicinvergiftung, B 319.
- Colicin, v. Acridine orange.
- Collagen, v. Age factor.
- , v. Gold.
- , v. Hageman factor.
- Collagen degrading enzyme; distribution and variation of a collagendegrading enzyme in the uterus of pregnant rats, B 675.
- Coloration, v. *Locusta migratoria*.
- Compartment theory; comment on the applicability of compartment theory to interacting biochemical systems, B 294.
- Competition, B 56.
- Complement, v. γ -Globulins.
- Comportement sexuel; influence des stimulations auditives sur le comportement sexuel du taureau, B 648.
- Conessine; the microbiological oxidation of conessine, B 256.
- Confluens sinuum*; Technik der Kanülierung des *Confluens sinuum* beim Kaninchen für Versuche mit partiellem extrakorporellem Kreislauf, B 108.
- Congressus, B 112, 168, 240, 416, 528, 712.
- Continuity, v. Physics.
- Contractility, v. Anoxia.
- Cooley's disease, v. Haemoglobin.
- Coral growth; possible effects of zooxanthellae on coral growth, B 140.
- Coronary constriction; physiological role of coronary constriction in the tortoise (*Emys orbicularis* L.), B 313.
- Cortex, cerebellar, v. Acetylcholin, Cholinesterase.
- Corticosteroids; the duration of action of certain corticosteroids in the acutely adrenalectomized rat as estimated by reference to their protective effect in endotoxin shock, B 230.
- Corticosterone; the relationship between corticosterone administration and cholinesterase activity in rats, B 425.

Corticosterone, v. Formaldehyde.

Cortisol-21-sulfat; die Isolierung von Cortisol-21-sulfat aus dem Urin von Cushing-Patienten vor und nach totaler Adrenalectomie, *B* 601.

Corynebacterium simplex; an epoxidation by *Corynebacterium simplex*, *B* 208.

Costaclavine from *Penicillium chermesinum*, *B* 25.

Covers for tubes, v. Aluminium-paper.

Crab muscle fibres, v. γ -Aminobutyric acid.

Cryoscope; a one-drop cryoscope: the tonicity of frog and goldfish sera, *B* 508.

Cu^{2+} ; Elektronenspinresonanzmessungen zur Untersuchung von Kinetik und Mechanismus von Cu^{2+} -katalysierten Reaktionen, *B* 599.

Cu^{++} , v. EMS.

Culex pipiens L., rote Augen als Mutante bei *Culex pipiens* L., *B* 527.

Culture flasks, airtight; the use of airtight culture flasks in anaerobic studies, *B* 292.

Cyclododecanone; photochemical γ -hydrogen transfer in cyclododecanone, *B* 260.

Cycloserine, v. Schiff base.

Cyprinus carpio L., v. Olfactory path.

Cystamine, v. Epilation.

Cysteamine, v. Irradiation.

Cysteine; the study of the cysteine content of the chicken erythrocyte histone by polarography, *B* 369.

-Cysteine, v. Catalase.

Cytolysis, immune, v. γ -Globulins.

Cytostatische Wirkung; zur Biochemie autoxydabler, H_2O_2 -bildender Verbindungen, *B* 117.

Dark discharge, v. Retinal units.

Deaminase, v. Glucosamine-6-phosphate deaminase.

trans-Decalones; the optical rotatory dispersion curves of trans-decalones and their polycyclic analogues, *B* 349.

Decortication, v. Medulla adrenal.

Deep culture; laboratory deep culture of micro-organisms using a vibrating stirrer, *B* 235.

Dehydroneotenone; synthesis of dehydroneotenone, *B* 668.

Deiters-neurons; the cerebellar-evoked monosynaptic inhibition of deiters-neurons, *B* 515.

Detergents; effect of some detergents on the surface membrane of penicillin spheroplasts, *B* 318.

Diabetes, v. Benzotriadinicini.

Dichlorisoproterenol; Einfluss von Dichlorisoproterenol (DCI) auf die Infusionstoxizität einiger Herzglykoside, *B* 229.

Dictamnus albus L., v. Bergapten.

Diencephalon-mesencephalon lesions, v. Mating behaviour.

Dihydroxyphenylalanine decarboxylase; on the presence of dihydroxyphenylalanine decarboxylase in nerves, *B* 328.

-N-Diisopropylaminoethoxy-butyrophenone, a new local anaesthetic drug, *B* 607.

Diperodon; neue lokalnästhetisch wirksame Analoga des Diperodons, *B* 582.

Diphenylamine; metabolism of diphenylamine in the rat and rabbit, *B* 223.

Diphtherieintoxikation, v. Thiaminpyrophosphatase.

β ,17 β -Dipyrrolidin-1-yl-5 α -androstan bismethiodide, v. Muscle relaxant.

Discontinuity, v. Physics.

Disputandum, *B* 46, 335, 527, 586.

Diterpene alkaloids, v. Imines.

Diterpenoid alkaloids; the biosynthesis of diterpenoid alkaloids, *B* 252.

Diurese, v. Inulin.

DNS; the degradation of deoxyribonucleic acid by L-cysteine and the promoting effect of metal chelating agents and of catalase, *B* 16.

; zum DNS-Gehalt in Speicheldrüsenkernen mit «übergrossen Riesenchromosomen» von *Drosophila melanogaster*, *B* 566.

, v. Guanine-Cytosine.

DNS-Synthese; autoradiographische Studien über die DNS-Synthese im Hypophysenvorderlappen der Ratte, *B* 384.

DOPA-Decarboxylierung, v. DOPA-Transaminierung.

DOPA-transaminierung; Einfluss der DOPA-Transaminierung auf die DOPA-Decarboxylierung *in vitro*, *B* 498.

DPN-Diaphorase, v. Multiple sclerosis.

Drosophila, v. Ganglia.

Drosophila melanogaster; genotypic control of mating times in *Drosophila melanogaster*, *B* 569.

, v. DNS.

Drug metabolism, v. AY 9944.

Drugs, v. Enzymes.

Drumsticks in the leucocytes of primates, *B* 679.

Dünnschichtchromatographie, v. Ammoniumverbindungen.

Dünnschichtstärkegelelektrophorese, *B* 588.

Dugesia dorotocephala, v. Regeneration.

Dysdercus koenigii, v. Keto acids.

Egg fluid, v. Amino acids.

Eichkurve; die Gültigkeitsgrenze der Eichkurve bei Null, *B* 470.

Einbettung, v. Acrylpolymerisation.

Eiweisstestung, v. Samen.

Eledoisin; synthetic peptides related to eledoisin, *B* 303, 306.

-, v. Peptidsynthese.

Elektronenspin, v. Cu^{2+} .

Embryon de poulet; étude comparative sur l'action de différents liquides (eau distillée, solution physiologique de chlorure de sodium, liquide de Tyrode) sur le développement de l'embryon de poulet, *B* 331.

-, action de la piqure et de l'eau distillée sur le développement de l'embryon de poulet, *B* 110.

-, action de la solution physiologique de chlorure de sodium sur le développement de l'embryon de poulet, *B* 282.

EMG responses to capsular stimulation in the human, *B* 691.

EMS; some meiotic consequences of ethyl methane sulphonate and the interaction of copper or zinc, *B* 494.

Emys orbicularis L., v. Coronary constriction.

Endotoxin shock, v. Corticosteroids.

Entropy production, v. Breathing.

Enzyme activities; alteration of enzyme activities in detached leaves and their counteraction by kinetin, *B* 214.

Enzyme forms, v. Terminologia.

Enzyme pattern, v. Androgen.

Enzymes, drugs and antibodies, some chemical common factors, *B* 113.

-, v. Gel filtration.

-, v. Radiation.

Epidermal growth factor; azione dell'«epidermal growth factor» sulla sintesi di acidi nucleici e proteine dell'epitelio cutaneo, *B* 146.

Epilation; protection contre l'épilation par la cystamine après irradiation locale chez le rat, *B* 699.

Epitaxie; orientierte Kristallabscheidung auf pflanzlichen Zellwänden, *B* 11.

Epitelio cutaneo, v. Epidermal growth factor.

Epoxidation, v. *Corynebacterium simplex*.

Erschlaffung, v. Spannungs-Frequenz-Diagramm.

Erythrocyte ghosts, v. ATPase activity.

Erythrocyten; die Rouleau-Bildung der Rindererythrocyten, *B* 567.

-, v. Phosphate release.

Erythrocytes, v. Cysteine.

-, v. Antibody formation.

-, v. Agglutination.

-, v. Hemolysis.

-, v. Histones.

Esterase; esterases in avian sera: species specific pattern and individual variations, *B* 286.

Esterase alterations in neurological mutants of the mouse, *B* 433.

Estrone; total synthesis of derivatives of ($\pm$)-6-oxa and aza-estrone, *B* 418.

Ethyl methane sulphonate, v. EMS.

Evolution, v. Intestine.

-, v. Mutation chromosomique.

Evolution chromosomique, v. *Sorex spez.*

Excitability, v. Anoxia.

Expansion contraction; on the expansion-contraction rhythm of the sea-anemone, *Actinia equina* L., *B* 571.

Experimentis, pro -, *B* 47, 103, 231, 292, 406, 461, 587, 644.

Extrasystolie, spontane, v. *Ciona intestinalis*.

Fatty acid oxidation; effect of feeding pattern on fatty acid oxidation by rat liver slices, *B* 434.

Fatty acids, v. α -Methyl dopa.

Feline brain, v. Brain.

Ferrioxamin B; Aufnahme von Ferrioxamin B durch Tomatenpflanzen, *B* 430.

Fett, v. Leberschädigung.

Fettsäuren, v. Ubichinongruppe.

Fibrinolytic system, v. Kidney.

Flagella formation; environmental control of the formation of flagella in *Chlamydomonas reinhardtii*, *B* 442.

Flow of a solution into a tube filled with solvent: static concentration and flow concentration of the solute, *B* 423.

- Flügelanlage, v. Limb bud.
N-2-Fluorenamine; oxidation of N-2-fluorenamine and 4-aminobiphenyl by peracetic acid, *B* 128.
Fluoroacetamide, v. Testes.
5-Fluorodeoxyuridine, v. 5-FUDR.
Folate reductase, v. Sepiapterin reductase.
Formaldehyde; incorporation of H³-progesterone activity into 18-OH-corticosterone and 18-OH-11-desoxycorticosterone, aldosterone and corticosterone following treatment of formaldehyde and hydrocortisone, in pregnant and new-born rats and immediately post partum, *B* 458.
-, v. Inosine.
Formate oxidation in *Saccharomyces cerevisiae*, *B* 370.
Formica polyctena, v. Verdauung.
N-Formilchinurenina, v. Gramicidina.
Freezing, v. Glycerol.
Frequentin, v. 6-Aminopenicillanic acid.
Frog larvae, v. Iodine.
Froschlärven, v. Alkylbenzolsulfonate.
Fucosidases du sac digestif d'*Helix pomatia*, *B* 441.
5-FUDR, v. Hydroxylamine.
Fugapavine; the structure of fugapavine, *B* 362.
Funambulus pennanti, v. Lipoid bodies.
Fusidic acid; the stereochemistry of fusidic acid, *B* 344.

 β -Galactosidase; effect of adrenalectomy and diet on the activity of β -galactosidase in the small intestine during the post-natal development of the rat, *B* 87.
Gametes and senescence, *B* 440.
Ganglia, cephalic; comparative observations on the behaviour *in vitro* of cephalic ganglia of wild homozygous and heterozygous *Drosophila*, *B* 404.
Geburtsplacenta, v. Placenta.
Gefrierpunktserniedrigung, v. Cryoscope.
Gehirn, v. ATPase-System.
Gel filtration; separation of catalase and other red cell enzymes from hemoglobin by gel filtration, *B* 103.
Genetic code; chemical basis of heredity, the genetic code, *A* 57.
Geruchsspur; über die Geruchsspur von *Lasius fuliginosus* zwischen Nest und Futterquelle, *B* 392.
Gibberellin, v. *Phaseolus coccineus*.
Gift, v. Cobragift.
16-epi-Gitoxigenin; Einfluss der 16-Hydroxylgruppe auf die Aktivität der Kardenolide. Die ionotrope Aktivität des 16-epi-Gitoxigenin, *B* 263.
Globuli vitellini, v. Mitochondri.
Globulins; the effect of aggregated γ -globulins on immune cytolysis: the role of complement, *B* 378.
Glucagon, v. Lipid metabolismism.
Glucosamine-6-phosphate deaminase; on the mechanism of the cation and substrate analog-activated enzyme reaction, *B* 211.
H³-D-Glucose; Einbau von H³-D-Glucose während der Oogenese bei *Apis mellifica* L., *B* 445.
Glucose metabolism; alternative pathways of glucose metabolism in developing chick brain, *B* 512.
Glucose transfer; electrical properties and glucose transfer in the goldfish intestine, *B* 613.
Glucose transport, v. Amino acids.
Glutamate decarboxylase and γ -aminobutyrate transaminase in developing rat brain, *B* 375.
Glutamine synthetase; a comparative study of the regional distribution and structural attachment of cerebral glutamine synthetase, *B* 686.
Glutathione instability in stored blood, *B* 420.
Glyceraldehyde-3-phosphate dehydrogenase; the mechanism of action of glyceraldehyde-3-phosphate dehydrogenase, *B* 408.
Glycerol; some remarks about the effect of glycerol on cells during freezing and thawing: electronspin resonance investigations concerning this effect, *B* 290.
Gold; reaction of gold with collagen *in vivo*, *B* 203.
Goldfish, v. Glucose transfer.
Golgi Apparat, v. Mitochondri.
Gonadotrophin excretion; remarkable seasonal variations of urinary gonadotrophin excretion in young girls, *B* 383.
Gramicidina; inattivazione della gramicidina dovuta alla conversione triptofano $\rightarrow$ N-Formilchinurenina, *B* 669.
Gram-quantities; a procedure for the preparation of gram-quantities of bacterial cell walls, *B* 253.
Graphisches Rechnen auf normalem Wahrscheinlichkeitspapier, *B* 413.
Growth hormone; human pituitary growth hormone, *A* 169.
Grünalgen, v. Canthaxanthin.
Gryllus argentinus, v. Chromosomes.
Guanidine HCl, v. CaCl₂.
Guanidino-pyrimidines, v. *Polio virus*.
Guanine-Cytosine-Verbindung; on the stability of the guanine-cytosine hydrogen bond, *B* 14.

Haemodynamics, v. Indole.
Hämoglobin vom «Alexandra-Typus» im ersten Lebensjahr, *B* 138.
-; RNA-induced biosynthesis of adult haemoglobin in cooley's disease, *B* 643.
Haemolymph, v. Keto acids.
Hageman factor; adsorption of Hageman factor (factor XII) on collagen, *B* 367.
Hamster, v. Insulin hypoglycaemia.
Haptoglobinuria following muscular exercise, *B* 44.
Haut, v. UV-Aktivierung.
Hauttransplantation, v. Homotransplantation.
Helix pomatia, v. Fucosidases.
Hemolysis in immune rabbits of autologous erythrocytes modified with common enterobacterial antigen, *B* 75.
Heparin; a method for turbidimetric measurement of heparin; its application to the estimation of heparin in aortic tissue, *B* 589.
Hepatocytes, v. Cellules vivantes.
Heredity; chemical basis of heredity, the genetic code, *A* 57.
Herz, v. *Ciona intestinalis*.
-, v. 15 α -Hydroxydigitoxigenin.
Herzglykoside, v. Dichlorisoproterenol.
Herzmuskel, v. Knotpunktpotential.
 Δ^3 -trans-Hexadecenoic acid; the occurrence of Δ^3 -trans-hexadecenoic acid in phosphatidyl glycerol from spinach leaves, *B* 511.
Histaminase activity; the serum histaminase activity in guinea-pig pregnancy, *B* 372.
-, v. Histamine.
Histamine; adaptation to histamine, histaminase activity, *B* 264.
-; adaptation of the guinea-pig to histamine. Sensitivity of the guinea pig's ileum to histamine and acetylcholine, *B* 271.
-; effect of histamine on the diameter of skeletal muscle fibers in mice, *B* 284.
-; the effects of intraperitoneal adaptation to histamine on the anaphylactic shock in the guinea-pig, *B* 90.
-, v. 2-Imidazolone.
Histamine release, v. Platelet agglutination.
Histamine ulcerations; the influence of intraperitoneal adaptation to histamine on the histamine ulcerations in the guinea-pig, *B* 220.
Histidine decarboxylase in the bone marrow of the rat, *B* 205.
Histone, v. Cysteine.
Histones; the specificity of histones in chicken erythrocytes, *B* 13.
H₂O₂; zur Biochemie autoxydabler, H₂O₂-bildender Verbindungen, *B* 117.
H₂O₂-Zerfall, v. Mutation, katalytische.
Höhenakklimatisation; der Sauerstoffumsatz der Leber von Ratten während der Höhenakklimatisation, *B* 704.
Homo habilis; early man in East Africa: new discoveries, *B* 584.
Homogenisator; ein Zellhomogenisator nach dem Prinzip von MERKENSCHLAGER und SCHLOSSMANN, *B* 654.
Homoiothermy; the postnatal development of homoiothermy in the Norwegian lemming (*Lemmus lemmus*), *B* 326.
Homotransplantation; Beitrag zur Homotransplantation der Menschenhaut, *B* 683.
Hormone, v. Growth hormone.
Hormone balance, v. Tumours, genetic.
5-HT, v. Psychopharmaca.
HVL, v. DNS-Synthese.
Hydrazine; v. *Influenza virus*.
Hydrazine sulfate; *in vitro* antiviral activity of hydrazine sulfate, *B* 325.
Hydrazinolyse; sur l'identification des résidus C-terminaux d'une protéine après hydrazinolyse, *B* 204.
Hydrogen peroxide; the influence of chelating agents on the prooxidative effect of a hydrogen peroxide producing methylhydrazine compound, *B* 73.
 γ -Hydrogen transfer, v. Cyclododecanone.
15 α -Hydroxydigitoxigenin; a new finding about the structure-activity relationship of cardiotonic steroids: lack of cardiotonic action in 15 α -hydroxydigitoxigenin, *B* 572.

Hydroxylamine; similar cytological effects of hydroxylamine and 5-FUDR, agents with different modes of action, *B* 158.
 -, v. Pyridoxal.
 5-Hydroxytryptamine; two types of 5-hydroxytryptamine release from isolated blood platelets, *B* 376.
 Hypertone Lösung, v. Nervenfasern.
 Hypochord in the anurans, *B* 493.
 Hypoglycaemia, v. Insulin hypoglycaemia.
 Hypothalamus, v. LH releasing factor.
 -, v. Sleep.

Iboga alkaloids, v. Methiodide.
 2-Imidazolone analogues of histamine, *B* 364.
 Imines; the chemistry of certain imines related to the diterpene alkaloids, *A* 1.
 Immune serum, v. RNA immuno carrier.
 Immunization, v. Antibody production.
 Immunoelectrophoresis par application directe de l'antigène à la surface du gel, *B* 49.
 Immunologische Reaktionsfähigkeit; über die Beziehungen zwischen Albumin- γ -Globulin-Quotienten und der immunologischen Reaktionsfähigkeit, *B* 74.
 Indole; the effects of an indole derivative 6-(2'-aminopropyl indole) on the general and coronary haemodynamics of the intact dog, *B* 526.
Influenza virus; inhibitory activity of benzoyl hydrazides and hydrazine on the growth of *influenza virus* in chick embryo lung tissue culture, *B* 438.
 Inosine; the reaction of inosine with formaldehyde, *B* 666.
 Insulin; a bioassay for insulin using the *in situ* mouse diaphragm, *B* 646.
 -, a diaphragm bioassay for the measurement of total 'insulin-like activity' and of 'antigenic insulin' in serum, *B* 105.
 Insulin hypoglycaemia; effects of insulin hypoglycaemia on the adrenal medulla of the hamster, *B* 630.
 Intestinal epithelium, v. Lipoid bodies.
 Intestine; establishment of the indigenous microbial flora of the intestines in the course of the evolution of vertebrates, *B* 504.
 -, v. Glucose transfer.
 Intestine, small, v. Amino acids.
 Inulin clearance and renal lymph, *B* 633.
 Iodine; the action of iodine upon thyroidectomized frog larvae, *B* 623.
 Iodoacetic acid, v. X-rays.
 Ion-exchange thin layers, v. Nucleic acids.
 Ionenpumpe; über eine mangelnde Parallelität zwischen Ionenpumpenhemmung und Kontraktionskraftsteigerung, *B* 565.
 Ionic fluxes; the relation between ionic fluxes and the action of drugs on smooth muscle, *B* 33.
 Iron, v. Retina.
 Irradiation; comparative study of the effect of antibiotics, bone marrow and cysteamine on oral lesions produced in hamsters by total body irradiation, *B* 403.
 -, v. Epilation.
 -, v. Kidney cells.
 Isocardenolides, *B* 248.
 Isocoumarin, v. Reticulol.
 Isolierte Organe; eine Anlage zur Perfusion isolierter Organe, *B* 644.
 α -Isopropyl- α -(2-dimethylaminoethyl)-1-naphthylacetamide (DA 992), a new anti-inflammatory agent, *B* 457.

K⁺, v. *Schizosaccharomyces pombe*.
 -, v. ATPase activity.
 Kallidin, v. Bradykinin.
 Kanülierung, v. *Confluens sinuum*.
 Kardenolide, v. 16-epi-Gitoxigenin.
 Katalyse, v. Cu²⁺.
 Keratohyalin granula; Beobachtungen über das Auftreten von Keratohyalin granula im Zellkern, *B* 422.
 Kerneinschlüsse, v. Colchicinvergiftung.
 Keto acids in the haemolymph of *Dysdercus koenigii*, *B* 383.
 Keto acids, v. Alkaloids.
 Kidney; inhibition of dog fibrinolytic system in experimental tubular necrosis of kidney, *B* 101.
 -, v. Androgen.
 Kidney cells; reproduction of irradiated monkey kidney cells: observations on fixed stained cultures and by phase contrast cinematography, *B* 680.
 Kinetin, v. Enzyme activities.
 Kinin; evidence for the renal origin of urinary kinin, *B* 396.

Kinin; über die Peptidsynthesen, Synthese von Methionyl-Lysyl-Bradykinin, einem Kinin aus Rinderblut, *B* 39.
Klebsiella pneumoniae; lysogenic *Klebsiella pneumoniae* strains of capsular serotype 2(B), *B* 83.
 Knotpunktpotential; ein Beweis für das Vorhandensein des Knotpunktpotentials am Herzmuskel, *B* 35.
 Kontraktionskraft, v. Ionenpumpe.
 Kreislauf, v. *Confluens sinuum*.
 Kristallabscheidung v. Epitaxie.

Laboratorio, pro -, *B* 235, 590, 652.
 Larvae, v. *Aeschna cyanea*.
Lasius fuliginosus, v. Geruchsspur.
 Leao spreading depression, v. Thalamic nuclei.
 Lebensalter, v. Ameisen.
 Leberschädigung, experimentelle; der Einfluss der experimentellen Leberschädigung auf Gesamtfett und ungesättigte Fettsäuren in Serum und Leber, *B* 50.
Lemmus lemmus, v. Homiothermy.
 Lens proteins; immunoelectrophoresis of avian lens proteins, *B* 145.
 Leucémie; paralysies révélatrices de la leucémie de Gross chez le rat, *B* 627.
 Leucine aminopeptidase activity in muscles of dystrophic mice, *B* 140.
 -, v. Drumsticks.
 Leucocytes, v. Phagocytosis.
 Leukaemia; examinations of the bactericidal properties of the serum against gram-positive microbes in patients suffering from leukaemia, malignant lymphoma, myeloma and myelofibrosis, *B* 124.
 Leukämische Zellen; Ultrastrukturänderung leukämischer retikulärer Zellen nach Zusatz von RNS aus normaler Milz zum Kulturmedium, *B* 69.
 Leukotaktische Wirkung; zur leukotaktischen Wirkung von Aminosäuren in *Liquor cerebrospinalis*, *B* 428.
 LH releasing factor; preparation of a luteinizing hormone releasing factor from sheep hypothalamus, *B* 311.
 Limb bud; on the regulative capacity of the chick embryo limb bud, *B* 443.
Limnaea; free amino acids in *Limnaea* III, *B* 134.
 Lipase, v. Tuberkulotika.
 Lipase activity, v. Thymectomy.
 Lipid metabolism; effect of glucagon on lipid metabolism, *B* 335.
 Lipids, v. Thyroxin.
 Lipoid bodies under different conditions of diet in the intestinal epithelium of a mammal *Funambulus pennanti* Wroughton, *B* 580.
 Lipoprotein, v. Agglutination.
Liquor cerebrospinalis, v. Leukotaktische Wirkung.
 Liver, v. Adrenal cortex.
 -, v. CCl₄.
 -, v. Fatty acid oxidation.
 -, v. Sepiapterin reductase.
 -, v. Thyroxin.
Locusta migratoria migratorioides R. F.; état hygrométrique, coloration et résistance chez l'imago de *Locusta migratoria*, *B* 97.
 Lung tissue culture, v. Influenza virus.
 Lymph, v. Inulin.
 Lymphocytose; évolution de la lymphocytose chez la souris «Swiss Albino» précocement thymectomisée, *B* 266.
 Lymphoma, v. Leukaemia.

Mannan from the extracellular surface of *Candida albicans* Berkhout, *B* 456.
 Manool, v. Ozonolyse.
 Masculinization and breeding of the WW *Xenopus*, *B* 622.
 Mast cell depletors; a calcifying topical reaction to mast cell depletors in the rat, *B* 209.
 Mast cells; distribution of mast cells in the mucous membrane of the human nasopharynx, *B* 254.
 Mast cells and monoamines, *B* 80.
 Mastocytomzellen, v. Podophyllostoffe.
 Mating behaviour; drastic changes in the mating behaviour of male rats following lesions in the junction of diencephalon and mesencephalon, *B* 460.
 Medulla, adrenal; morphological modifications in the adrenal medulla after decortications of different extent in the left cerebral hemisphere, *B* 560.
 Meiosis, v. EMS.

- Melanin, v. Radicals.
 Melatonin, v. Sleep.
 Membrana nucleare; passaggio di nucleoli attraverso la membrana nucleare negli ovociti in accrescimento di *Patella coerulea* L., B 550.
Mesostoma lingua; attività di neurosecrezione nel sistema nervoso di un turbellario rabdocelo: *Mesostoma lingua*, B 150.
 Metamorphosis, v. *Tribolium confusum*.
 Metaraminol; modification of the hypertensive effect of metaraminol, B 698.
 Methiodide formation and the stereochemistry of the ethyl side chain of iboga type alkaloids, B 36.
 Methylazo-compounds, v. Antitumour agents.
 α -Methyldopa; effect of α -methyldopa and α -methyl-m-tyrosine on the mobilization of free fatty acids, B 495.
 Methylhydrazine; cytostatischer Wirkungsmechanismus der Methylhydrazine, B 38.
 Methylhydrazine compound, v. Hydrogen peroxide.
 α -Methyl-m-tyrosin, v. α -Methyldopa.
 Metopiron, v. Angiotensin II.
 Microbial flora, v. Intestine.
 Microelectrodes; measurement of glass microelectrodes, B 231.
 Milchsäuredehydrogenase, v. Multiple sclerosis.
 Mineralhaushalt und hormonale Aktivität im Winterschlaf, A 178.
 Mitochondrien; der Einfluss von 4-Benzylhydroxy-3,5-dijodbenzoesäure auf die oxydative Phosphorylierung von Leber- und Tumormitochondrien, B 578.
 Mitochondries, v. Monoamineoxydase.
 Mitochondri, zone del Golgi e globuli vitellini negli ovociti in accrescimento di *Planorbis corneus* L., B 29.
 Monoamine, v. Adrenalin-Oxydasen.
 Monoamine neurons, v. Psychopharmaca.
 Monoamineoxydase; solubilisation de la monoamineoxydase des mitochondries de foie de rat, B 374.
 Monoamines; localization of monoamines in the lower brain stem, B 398.
 -, v. Mast cells.
 Monosynaptic reflex, v. Sleep.
 MoO_4^{2-} , v. Mutation, katalytische.
 Mosquito eggs; the agar gel-diffusion technique as a method of differentiating mosquito eggs, B 429.
 Motoneurons, v. Spinal cord.
 MRDV, v. Polyphenoloxidase activity.
 MSH; modified *in vivo* assay for MSH, B 461.
 Mucopolysaccharides, v. Rivanol precipitation.
 Multiple sclerosis; quantitative enzyme profiles of plaques of multiple sclerosis, B 130.
 Muscle, smooth, v. Ionic fluxes.
 Muscle fibres, v. γ -Aminobutyric acid.
 -, v. Photodynamic effect.
 Muscle fibres, skeletal, v. Histamine.
 Muscle-relaxant properties of a steroid bis-quaternary ammonium salt, B 119.
 Muscle spindle; reduction of dynamic sensitivity of primary muscle spindle endings in experimental tremor, B 554.
 Muscles, v. Leucine aminopeptidase.
 Muscular exercise, v. Haptoglobinuria.
 Mustard, v. Nitrogen mustard.
 Mutation chromosomique; evolution chromosomique et spéciation chez les mus du sous-genre *Leggadia* Gray 1837, A 657.
 Mutation, katalytische; die katalytische Mutation der Ionen Al^3 und MoO_4^{2-} im H_2O_2 -Zerfall, B 420.
 Mutterkornalkaloid, v. Costaclavine.
Mycobacterium 607; phosphatases of *Mycobacterium* 607, B 671.
 Myelofibrosis, v. Leukaemia.
 Myeloma, v. Leukaemia.
 Myocardial damage, anoxic; histochemically demonstrable phosphorylase as an early index of anoxic myocardial damage, B 373.
 Myoinositol excretion in the newborn infant, B 602.
Myzus persicae, v. Speichelscheide.
 NADH, v. Phagocytosis.
 NADPH, v. Phagocytosis.
 Nasopharynx, human, v. Mast cells.
 Nebennierenrinde, v. Angiotensin II.
 Neoplasms; a review of the chemical induction of neoplasms in amphibians, A 241.
 Nerve fibres; fluctuations in excitability of single myelinated nerve fibres, B 553.
 Nervenfasern; zur Wirkung hypertoner Lösungen auf die markhaltige Nervenfasern, B 31.
 Nerves; apparatus for *in vitro* studies of mammalian peripheral nerves and spinal funiculi, B 590.
 -, v. Dihydroxyphenylalanine decarboxylase.
 Nervous cells; the nature of the solitary active cells of the central nervous system, B 259.
 Netzhaut; Bilaterale Projektion der Netzhaut auf die Sehirinde des Kaninchens, B 685.
 Neural tube; the formation of the front part of the neural tube, B 92.
 Neurological mutants, v. Esterase.
 Neurons, v. Antidromic responses.
 Neuropharmaka, v. Adrenalin-Oxydasen.
 Neurosecretion, v. *Mesostoma lingua*.
 Nicotiana hybrids, v. Tumours, genetic.
 Nicotin; Abschwächung der Toxizität von Nicotin durch Erhöhung der Thrombocytenzahl, B 432.
 Niere, v. Bleivergiftung.
Niphargus aquilex schellenbergi, v. Light sensitivity.
 Nitrate reductase, v. *Oryza sativa*.
 Nitrogen, v. Tobacco plant.
 Nitrogen mustard; does nitrogen mustard mimic the X-ray effects in any case?, B 70.
 Nobelpreisträger, D 709.
 Noradrenalin depletion; rate of depletion of noradrenaline in some peripheral tissues induced by a reserpine injection, B 679.
 Norepinephrine, v. Phenoxybenzamine.
 Nuclear membrane, v. Membrana nucleare.
 Nucleic acids; separation of the constituent nucleotides of nucleic acids on ion-exchange thin-layers, B 406.
 Nucleolar synthesis; chromosomal control of nucleolar synthesis, B 156.
 O_2 -Umsatz, v. Höhenakklimatisation.
 Olfactory path; regeneration of olfactory paths in carp (*Cyprinus carpio* L.), B 519.
 Oogenese, v. H^3 -D-Glucose.
 Oogenesis, avian, and yolk deposition, B 26.
 Ophthalmoscopy of pigeons using transillumination, B 466.
 Opsonin; studies on the chemical composition of streptococcal co-opsonin, B 603.
 Orthodromic activation, v. Antidromic activation.
Oryza sativa; rice blast, nyctotemperature and nitrate reductase, B 508.
 Ouabain; effect of ouabain on the active potassium accumulation, B 127.
 Oxacillin, v. Plate test.
 Oxidation, microbiological, v. Coenzyme.
 Oxydasen; zum Reaktionsmechanismus von Oxydasen, B 46.
 Oxygen uptake rhythms in a cockroach gauged by variance spectra, B 40.
 Oxytocine; synthesis of N-protected oxytocines, B 487.
 Oxytocin, v. Thyreotropin.
 Oxytocin analogue; a biologically active analogue of oxytocin not containing a disulfide group, B 570.
 Ozonolyse; l'ozonolyse «anormale» des dérivés allyliques appliquée à la dégradation du manool en oxydes odorants $\text{C}_{18}\text{H}_{20}\text{O}_2$, B 609.
 P^{32} , v. X-rays.
Papaver somniferum L., v. Alkaloids.
 Papierchromatogramme; automatisches Auftragen von Papierchromatogrammen, B 104.
 Parathyroid cells; observations on two types of protein granules in primate and avian parathyroid cells, B 444.
Pasteurella pseudotuberculosis, v. Penicillin.
Patella coerulea L., v. Membrana nucleare.
 Penicillin; the effect of penicillin on *Pasteurella pseudotuberculosis* morphology, B 136.
 Penicillinase, v. Plate test.
Penicillium chermesinum, v. Costaclavine.
 Peptides, v. Eledoisin.
 Peptides, steroidal, B 545.
 Peptidsynthesen; C-terminale Teilsequenzen des Eledoisins und eledoisinanaloger Verbindungen, B 19.
 Peptidsynthese, v. Kinin.
 Peracetic acid, v. N-2-Fluorenamine.
 Perfusion, v. Isolierte Organe.
 Permeability, v. Ultrasound.
 Pflanzensterine, v. Ubichinongruppe.

Phagocytosis; biochemical aspects of phagocytosis in polymorphonuclear leucocytes. NADH and NADPH oxidation by the granules of resting and phagocytizing cells, *B* 21.

Phaseolus coccineus L., über ein gebundenes Gibberellin, *B* 89.

Phenoxybenzamine; dual site of action of phenoxybenzamine in the cat's spleen: Blockade of α -adrenergic receptors and inhibition of re-uptake of neurally released norepinephrine, *B* 272.

Phénylalanine- ^3H , v. Chloroplastes.

Phloretin, v. Phosphate release.

Phosphatase, v. *Mycobacterium* 607.

Phosphatase activity during the growth and metamorphosis of *Tribolium confusum* Duval, *B* 86.

Phosphatase, alkaline; continuous optical determination of alkaline phosphatase, *B* 464.

Phosphate release; intracellular phosphate release by the $\text{Na}^+\text{-K}^+$ -activated membrane ATPase, *B* 551.

Phosphoethanolamine, v. X-rays.

Phospholipase D; action of plastid phospholipase D on free and lipoprotein-bound phospholipids, *B* 557.

Phospholipaseaktivität; Serienbestimmung der Phospholipase-A-Aktivität in chromatographischen Fraktionen, *B* 293.

Phospholipids, v. Phospholipase.

Phosphoproteinphosphatase activity in sea urchin embryos, *B* 385.

Phosphorylase, v. Myocardial damage, anoxic.

Phosphorylierung, oxydative, v. Mitochondrien.

Photic stimulation, v. Visual potentials.

Photodynamic effect of dye on frog muscle fibre using micro-electrodes, *B* 368.

Physalaemin; structure and pharmacological actions of physalaemin, the main active polypeptide of the skin of *Physalaemus fuscumaculatus*, *B* 489.

—; synthesis of physalaemin, *B* 490.

Physalaemus fuscumaculatus, v. Physalaemin.

Physalia, v. Cholesterol.

Physarum polycephalum, v. Chromosome condensation.

Physics, theoretical; the problem of continuity or discontinuity in the fundamental concepts of theoretical physics, *A* 593.

Phytohemagglutinin; human peripheral blood in tissue culture and the action of phytohemagglutinin, *B* 164.

Pigment reddish brown, v. *dl*-Tryptophan.

Pigmentation, iron; iron pigmentation of the gut of germ free and conventionalized guinea pigs, *B* 391.

Pila, v. Amino acids.

Pineal body; electron microscopic study of impuberal and adult rats pineal body, *B* 556.

+Piperidones; ketal formation in +piperidones, *B* 437.

Pitch discrimination, v. Sleeping cat.

Pituitary activity, v. Renal hypertrophy.

Pituitary-adrenal stimulation, v. 1-Aminocyclopentanecarboxylic acid.

Pituitary hormone, v. Growth hormone.

Placenta; über die Herkunft der auf der Basalplatte liegenden, den intervillösen Raum begrenzenden Zellen bei der Geburtsplacenta des Menschen, *B* 687.

Planorbis corneus, v. Mitochondri.

Plate assay method, v. Amoebicides.

Plate test with oxacillin and penicillinase, *B* 49.

Platelet agglutination; inhibition of endotoxin-induced platelet agglutination, histamine and serotonin release *in vitro* by thiol-compounds, *B* 315.

Pleuropneumonia, v. PPLO.

Plumierids; zur Biosynthese des Plumierids, *B* 250.

Pneumococci, v. Spheroplast-like cells.

Podophyllumstoffe; Aufnahme von Thymidin durch Mastocytozellen *in vitro* unter der Einwirkung von Podophyllumstoffen, *B* 524.

Poissons, v. Respiration tissulaire.

Polarography, oscillographic; application of oscillographic polarography in photochemistry of some deoxyribonucleic acids, *B* 587.

Polio virus; *in vitro* *polio virus* inhibition by two guanidinopyrimidines, *B* 12.

Polyarthritis, v. Arthritis.

Polyembryony; occurrence of polyembryony in *Vanda* during *in vivo* and *in vitro* conditions, *B* 388.

Polymorphism, chromosomal; chromosomal polymorphism in the guinea pig, *Cavia porcellus*, *B* 324.

Polymyxin B_1 ; total synthesis of the antibiotic polymyxin B_1 , *B* 365.

Polypeptides antifungal, v. *Bacillus subtilis*.

Polyphenoloxidase activity in healthy maize plants and in those infected by the maize rough dwarf virus (MRDV), *B* 274.

Postsynaptic inhibition in motoneurons evoked from the lower reticular formation, *B* 701.

Potassium accumulation, v. Ouabain.

Poterium spinosum und sein Einfluss auf den Blutzuckergehalt von Kaninchen, *B* 78.

PPLO; decontamination of pleuropneumonia-like organism (PPLO) infected tissue cultures, *B* 651.

Prednisolon, v. Adrenocortical atrophy.

Pregnancy, v. Histaminase activity.

—, v. Collagen degrading enzyme.

H^3 -Progesterone, v. Formaldehyde.

Progressus, studiorum —, *B* 50, 110, 158, 236, 295, 336, 408.

Pronephric system; pronephric system in haploid and diploid larvae of *Xenopus laevis*, *B* 289.

D,L-Pronuciferin, *B* 380.

3-(*p*-Propionyl-*o*-methoxy-phenoxy)-1,2-propanediol; influence on central nervous system of 3-(*p*-propionyl-*o*-methoxy-phenoxy)-1,2-propanediol, *B* 457.

Protein, v. Agglutination.

—, v. Radicals.

Protein granules, v. Parathyroid cells.

Proteine, v. Hydrazinolyse.

Protomyces macrosporus, v. Chlamyospore germination.

Psychopharmaca; effects of certain psychopharmaca on intraneuronal levels of 5-HT and catecholamines in the specific monoamine neurons of the rat brain, *B* 690.

Psychotomimetica, v. Amphetamines.

Psychotrope Pharmaka, v. Strahlenschutzwirkung.

Pyridinium couples; on the interaction of 1-alkyl pyridinium couples, *B* 506.

Pyridoxal; polarographic study of the reaction of pyridoxal with hydroxylamine, *B* 301.

Pyrimidines, v. *Polio virus*.

Pyrophosphate; the inhibitory effect of pyrophosphate on calcium oxalate precipitation and its relation to urolithiasis, *B* 276.

Radiation; the effects of radiation on enzymes in tissue cultures, *B* 154.

Radicals, free; the interaction of free radicals in protein and melanin, *B* 76.

Radiocarbon dating; the direct conversion of wood charcoal to lithium carbide in the production of acetylene for radiocarbon dating, *B* 47.

Rana pipiens, v. CaCl_2 .

Red nucleus, v. Antidromic activation.

Refractoriness, v. Anoxia.

Regeneration, v. Cartilage cells.

—; electrolyte exchange in regenerating *Dugesia dorotocephala*, *B* 121.

Renal clearance; the measurement of the renal clearance of γ -emitting tracers by the use of external counting, *B* 148.

Renal excretion of calcium-disodium-ethylenediaminetetraacetic acid—a new tubular secretory mechanism, *B* 99.

Renal failure; serum antiheparin activity in chronic renal failure, *B* 583.

Renal hypertrophy; thyroid and pituitary gland activity during compensatory renal hypertrophy, *B* 694.

Renal necrosis and blood flow; the use of tetracycline fluorescence to identify necrosis of renal tubules and to assess renal blood flow, *B* 393.

Reproduction, rat, v. Benzpyrene.

Reserpine; depression of the isolated guinea-pig uterus by reserpine, *B* 151.

—, v. Chlorpromazine.

—, v. α -Rigidity.

—, v. Noradrenalin depletion.

Résistance, v. *Locusta migratoria*.

Resonanzmessung, v. Cu^{2+} .

Respiration; inhibition of respiration of *Aspergillus oryzae* by adsorption of the mycelium on cellulose acetate fibres, *B* 132.

Respiration tissulaire; la respiration tissulaire chez les poissons: étude des conditions optimales pour obtenir et mesurer une «respiration potentielle» sur broyats tissulaires, *B* 221.

Respiratory influences, v. Aortic nerve.

Reticular formation, lower, v. Postsynaptic inhibition.

Reticulol, a new metabolic isocoumarin, *B* 258.

Retina; the importance of sulfur and iron in the retina as determined by paramagnetic resonance studies, *B* 399.

Retinal units; slow periodicity in the dark discharge of retinal units, *B* 226.

Rhoifolin; isolation of rhoifolin from *Chorisia species* (Bombacaceae), *B* 562.

- β -D-Ribofuranosyl- β -D-ribofuranoside, crystalline; a new diriboside synthesis, B 48.
- Ribonucleaseaktivität isolierter Nebennierenmarkgranula, B 547.
- Rifamycin B; Konstitution des Rifamycins B und verwandter Rifamycine, B 336, 339, 343.
- α -Rigidity in reserpinized rats, B 79.
- Rivanol precipitation; evaluation of the method of rivanol precipitation of (35 S) sulphated mucopolysaccharides present in the material obtained from a small group of cells, B 397.
- RNA immuno carrier; presence of RNA immuno carrier in immune rabbits serum, B 447.
- , v. Auto haemoantibody response.
- RNA-induced biosynthesis of adult haemoglobin in Cooley's disease, B 643.
- RNS, v. Leukämische Zellen.
- Rouleau-Bildung, v. Erythrocyten.
- Ruzicka-Preis, Fonds, B 56.
- 35 S; periodicity of 35 S uptake in rat femurs, B 137.
- Saccharomyces cerevisiae*; formate oxidation in *Saccharomyces cerevisiae*, B 370.
- Samen; zur kristallmorphologischen Eiweisstestung von Samen, B 54.
- Sanarelli-Shwartzman reaction, v. Blood clotting.
- Schiff base of cycloserine, B 417.
- Schizosaccharomyces pombe*; a method for the selection of auxotrophic mutants of the yeast *Schizosaccharomyces pombe*, B 320.
- , mutants of the yeast *Schizosaccharomyces pombe* requiring a high concentration of potassium, B 638.
- Schwefel als Ligandatom in Chelatkomplexen, B 297.
- Scopolamine; regional changes of acetylcholine and choline acetylase activity in the guinea-pig's brain after scopolamine, B 677.
- Sea urchin, v. Phosphoproteinphosphatase.
- Sea urchins; further morphological and biochemical studies on normal and hybrid embryos of sea urchins, B 236.
- Secretory mechanism, v. Renal excretion.
- Sehrinde, v. Netzhaut.
- Seitenliniensystem; the supposed use of the lateral line as an organ of hearing in fish, B 586.
- Senescence, v. Gametes.
- Sensilla; some common features of three types of insect sensilla, B 509.
- Sepiapterin reductase; on the presence of sepiapterin reductase different from folate and dihydrofolate reductase in chicken liver, B 574.
- Sera, avian, v. Esterase.
- Serotonin; protection of *Vicia faba equina* against X-rays by serotonin, B 390.
- Serotonine release, v. Platelet agglutination.
- Serotype 2(B), v. *Klebsiella pneumoniae*.
- Serum, v. Insulin.
- , v. Leberschädigung.
- , v. Leukaemia.
- , v. Renal failure.
- Sex determination, polygenic, A 190.
- Sexualverhalten, v. Comportement sexual.
- Simaroubaceous bitter principles; a biogenetic proposal for the simaroubaceous bitter principles, B 297.
- Sinnesorgane, v. Seitenliniensystem.
- Skeleton, v. Thalidomide.
- Skin surface, v. Bacteria growing.
- Sleep; monosynaptic reflex and natural sleep, B 316.
- , v. Spinal reflex.
- Sleep cycles; comparative study of sleep cycles in rodents, B 280.
- Sleep induced by the administration of melatonin (5-methoxy-N-acetyltryptamine) to the hypothalamus in unrestrained cats, B 435.
- Sleeping cat; a hypothesis concerning the sharp pitch discrimination observed in the sleeping cat, B 415.
- Small intestine, v. Active transport.
- Smooth muscle; ciliated smooth muscle cells in the uterus of the rat, B 322.
- Sodium transport, v. Amino acids.
- Solanum tuberosum*; ovule development in the carpeloid stamens of *Solanum tuberosum*, B 615.
- Soleus-Muskel, v. Adrenalin.
- Solution, v. Flow.
- Solution physiologique de chlorure, v. Embryon de poulet.
- Solvent, v. Flow.
- Sorex spezi*; évolution chromosomique chez genre *Sorex*: nouvelle information, B 314.
- Spannungs-Frequenz-Diagramm; Bestimmung des zeitlichen Verlaufes der Erschlaffung der kontraktile Elemente mit Hilfe des Spannungs-Frequenz-Diagrammes, B 676.
- Speicheldrüsenkerne, v. DNS.
- Speichelscheide; evidence that two species of aphid ingest food through an open stylet sheath, B 582.
- Sperm nucleus of *Clibanarius longitarsis*, B 505.
- Spermatogenèse, v. AET.
- Spheroplast-like cells of *Pneumococci*, B 135.
- Spheroplasts, penicillin, v. Detergents.
- Spinach leaves, v. Δ^8 trans Hexadecenoic acid.
- Spinal cord; polysynaptic activation of extensor motoneurons from group Ia fibres in the cat spinal cord, B 628.
- , v. Chondrogenesis.
- Spinal funiculi, v. Nerves.
- Spinal reflexes; spinal reflexes in normal unrestrained cats during sleep and wakefulness, B 577.
- Spirographis spallanzani*, v. Ubiquinone.
- Spleen, v. Phenoxybenzamine.
- Spleen cells, v. Antibody formation.
- Sr 85 , v. Absorption.
- Staphylococcus aureus*; alteration of resistant *Staphylococcus aureus* cultures by contact with yeast products, B 520.
- Steroids, cardiotonic, v. 15 α -Hydroxydigitoxigenin.
- Stipa vaseyi*; the hypnotic constituent of *Stipa vaseyi*, sleep grass, B 390.
- Strahlenschutzwirkung neuerer psychotroper Pharmaka, B 389.
- Streptococcal-Co-opsonin, v. Opsonin.
- Streptomyces psammoticus*, v. 2-Acetyl-2-decarboxamidotetracycline.
- Streptomyces sp.*, v. AC $_2$ 435.
- Stylet sheath, v. Speichelscheide.
- Succinodehydrogenase, v. Température.
- Sugar, v. Active transport.
- Sulfur, v. Retina.
- Tagesperiodik des O $_2$ -Umsatzes der Rattenleber, B 706.
- Température; influence de la température de l'air ambiant sur quelques activités métaboliques d'animaux hétérothermes, B 401.
- Temperature; the influence of temperature on the activity of spinal α - and γ -motoneurons, B 450.
- Terminologia, B 592.
- Testes; selective destruction in testes induced by fluoroacetamide, B 492.
- Testosterone effect; inhibition of the testosterone effect on the submaxillary gland by actinomycin D, B 612.
- Tetracycline fluorescence, v. Renal necrosis.
- 1, 2, 3, 4-Tetrahydroisochinoline; Konfiguration und pharmakologische Aktivität bei 1-phenäthylsubstituierten 1, 2, 3, 4-Tetrahydroisochinolininen, B 488.
- Thalamic nuclei; Leao's spreading depression in the thalamic nuclei of rat, B 635.
- Thalidomide; effect of thalidomide on the skeleton of the rat foetus, B 283.
- Thawing, v. Glycerol.
- Theoria, B 294.
- Thiaminpyrophosphatase bei der experimentellen Diphtherieintoxikation, B 72.
- Thiochrome; a novel reduction of thiochrome, B 10.
- Thiol compounds, v. Platelet agglutination.
- Thrombozyten, v. Chlorpromazine.
- , v. Nicotin.
- Thymectomie, v. Lymphocytose.
- Thymectomy; effect of thymectomy on lipoprotein lipase activity in the serum and the heart of rats, B 708.
- Thymidin, v. Podophyllostoffe.
- Thymidine-H, v. Chloroplastes.
- Thymus, v. X-rays.
- Thyreotropin; inhibition of *in vitro* release of thyreotropin by an analogue of oxytocin, 3-valine oxytocin, B 673.
- Thyroid activity, v. Renal hypertrophy.
- Thyroidectomized frog larvae, v. Iodine.
- Thyroxine; effect of l- and d-thyroxine on the supraoptic neurosecretory ganglion of the rat, B 94.
- , the effect of thyroxine on the formation of oxidation products of lipids by rat liver tissue under different nutritional conditions, B 525.
- Tigogenin and ursolic acid from *Cestrum diurnum* Linn., B 200.

issue culture; human peripheral blood in tissue culture and the action of phytohemagglutinin, *B* 164.
v. Radiation.
tobacco plant; carbohydrate and nitrogen content of a virus-diseased tobacco plant, *B* 618.
tomatenpflanzen, v. Ferrioxamin B.
onus effect; new contributions to the tone-inhibiting effect of catecholamine in the fresh-water mussel, *B* 620.
transillumination, v. Ophthalmoscopy.
remor, v. Muscle spindle.
Tribolium confusum; phosphatase activity during the growth and metamorphosis of *Tribolium confusum* Duval, *B* 86.
v. ATP.
-Tryptophan; production of reddish-brown pigment from dl-tryptophan by enterobacteria of the proteus-providencia group, *B* 637.
L-Tryptophan- H^3 , v. Bladder epithelium.
uberkulotika; ein Beitrag über die Art der Wirkung einigen Antituberkulotika, *B* 650.
umorgewebe; Untersuchungen über das Verhalten von Tumorgeweben in Diffusionskammern gegenüber eindringender Wirtszellen bei tumorresistenten Ratten, *B* 327.
umours, v. Benzpyrene-induced tumours.
umours, genetic; genetic tumours of *Nicotiana* hybrids and the hormone balance, *B* 518.
unicatenherz, v. *Ciona intestinalis*.
Ubichinongruppe; über Ursprung und Funktion einiger Methylgruppen in verzweigten Fettsäuren, in Pflanzensterinen und in Chinonen der Vitamin-K- und Ubichinongruppe, *B* 473.
biquinone; unsaponifiable constituents in *Spirographis spallanzani*, *B* 347.
ulceration, v. Histamine ulcerations.
eine, v. Aspidosperma alkaloids.
ultrasound; indirect effect of ultrasound on water permeability of the connective tissue, *B* 120.
uridine- 3H , v. Chloroplastes.
urkinase des Meerschweinchens, *B* 546.
urolithiasis; the inhibitory effect of pyrophosphate on calcium oxalate precipitation and its relation to urolithiasis, *B* 276.
uronic acid, v. Tigogenin.
v. Collagen degrading enzyme.
urus, v. Reserpine.
v. Smooth muscle.
V-Aktivierung; antirachitische UV-Aktivierung von Hundehaut *in vitro* und *in vivo*, *B* 166.
anda, v. Polyembryony.
usopressin analogues with selective pressor activity, *B* 42.
Veratridine; the chemoreflex induced by intraarterial injection of aza-azepinophenothiazine veratridine and bradykinin into femoral and brachial arteries of innervated and divided limbs of a dog, *B* 394.
Verdauung; Untersuchungen zur Verdauungsphysiologie von *Formica polyctena* Foerst., *B* 330.
Verhalten, v. Ameisen.
Vibrating culture; metabolic properties of micro-organisms in vibrating culture, *B* 257.
Vicia faba equina, v. Serotonin.
Virus-diseased, v. Tobacco plant.
Viruspartikel; das Auftreten von Viruspartikeln in *Abutilon*-Chloroplasten, *B* 497.
Visual potentials; primary visual potentials in man during repetitive photic stimulation, *B* 641.
Vitamin K, v. Ubichinongruppe.
Vocalization, infant; the identification of some specific meanings in infant vocalization, *B* 154.
Volume analysis of liquid droplets by a rapid photographic method, *B* 652.
Vorhofmuskulatur, v. Acetylcholin.
Wahrscheinlichkeitspapier, v. Graphisches Rechnen.
Water loading, v. Adrenocortical atrophy.
Winterschlaf, v. Mineralhaushalt.
X-irradiation, v. AET.
X-ray analysis, v. Rifamycin B.
X-ray effects, v. Nitrogen mustard.
X-rays; *in vitro* and *in vivo* effect of X-rays and of iodoacetic acid on P 32 incorporation into phosphoethanolamine of rat thymus cells, *B* 299.
-, v. Serotonin.
Xenopus, v. Masculinization.
Xenopus laevis, v. Pronephric system.
-, v. Benzpyrene-induced tumours.
D-Xylose, a substrate for the process of sugar active transport by the small intestine, *B* 302.
Yeast, v. *Schizosaccharomyces pombe*.
-, v. *Staphylococcus aureus*.
Yolk deposition, v. Oogenesis.
Zellkern, v. Keratohyalin granula.
Zn $^{++}$, v. EMS.
ZNS, v. Neural tube.
Zone electrophoresis; albumen-gel as a supporting medium in zone electrophoresis, *B* 234.
Zooxanthellae, v. Coral growth.
Zucker; die katalytischen Eigenschaften einiger Zucker in homogener Lösung, *B* 426.
